

Inclusion of Electives: Improving the STEM Strand Curriculum

Teacher & Student Perception

1

CHAPTER 1: INTRODUCTION

Lack of Career-Focused Subjects

Few **engineering**, **medicine**, or **technology**-related subjects

2

CHAPTER 2: LITERATURE REVIEW

Compulsory
Foundational Courses

*In other nations,
SHS models
strike a balance
between
structure and
choice.*

Offering
Optional Electives

3

CHAPTER 3: METHODOLOGY

Assess Current
Subjects

Evaluate Possible
Electives

Integrate
Feedback

CHAPTER 5: CONCLUSION

Provide Career-Focused Subjects by Offering Electives

- Technical Drawing
- Product Design

- Human Anatomy
- Hands-On First Aid

- Program & Logic Formulation
- Robotics
